

Mechanical Commissioning Agent

Are you fairly compensated for your efforts?
Is your career personally and professionally fulfilling?
Is your current position challenging and rewarding?
Do you want a better opportunity?

Not all companies are the same. Hood Patterson & Dewar is committed to operating under a servant leadership mentality to continue providing best-in-class services to our clients while taking care of our people, who are indeed our greatest asset. We have a long track record of success – in fact, 2022 marks 40 years of satisfying clients, and our parent company, Patterson & Dewar Engineers, Inc., has been in business for 75 years.

HP&D is employee-owned – not principal-owned, not corporate-owned, and our profits are redistributed to all the employees. Your experience as a Mechanical Commissioning Agent with us will be different because we are:

- Financially stable and responsibly managed
- Focused on the quality of work and client satisfaction
- A flat organization that values our agile teams. We encourage employees to cross-train and develop a wide array of skills to better serve our clients
- Dedicated to empowering employees to advance their careers through the Employee Development Program, which encourages professional growth

Responsibilities

The mechanical engineering candidate will function as a member of our Mechanical Systems Commissioning Group, which commissions medium and large mission-critical facilities (i.e., corporate data centers, laboratories, biological research centers) to ensure all building mechanical systems are complete and operating properly.

- Participate in all phases of commissioning projects
- Review and analyze data and prepare technical reports for client feedback
- Perform design reviews of systems
- Work with teammates to manage projects efficiently while exceeding client expectations for technical excellence
- Comply with all safety requirements to ensure a safe working environment
- Create and carry out all testing procedures
- Investigate and troubleshoot problems; diagnose and repair faults

Required Skills and Qualifications

The ideal candidate will have:

- A Bachelors of Science in Mechanical Engineering preferred but not required
- 5 years of commissioning experience in data center facilities is preferred but not required
- Former building automation control and LEED experience a plus
- Excellent communication skills (verbal and written)
- Ability to interact with project team members
- Excellent time management and scheduling discipline
- Project management experience
- Flexibility to accommodate at least 80% domestic travel and extended hotel stays

We are looking for MEP CxA, QA/QC, and NETA-certified Level 3 or 4 individuals passionate about their work. Join our team and see why we are consistently named one of the Atlanta Journal-Constitution's Top Workplaces
