

SAFETY AND HEALTH MANAGEMENT SERVICES

The Safety Services Team offers a range of professional Safety and Health Management System (SHMS) services in the areas of management leadership & employee involvement (ML&EI), worksite analysis (WSA), hazard prevention & control (HP&C), and safety & health training (S&HT). We design, implement, and evaluate safety solutions that protect people, property, and profits while ensuring OSHA and other regulatory compliance.

SAFETY IS SERIOUS BUSINESS

OSHA/EPA/DOT Compliance

The Safety Services team has in-depth experience designing, developing, and implementing safety, health, and environmental regulatory compliance programs in union and non-union manufacturing, construction, substation, data center, fleet transportation, maritime, and corporate office environments across the United States and Canada.

OSHA Cooperative Programs including the Voluntary Protection Program (VPP)

Our Safety team supports organizations in implementing OSHA cooperative programs, including the Safety and Health Achievement Recognition Program (SHARP) and the Voluntary Protection Program (VPP). Additionally, we have assisted clients in achieving OSHA Partnerships as well as SHARP and VPP certifications for multiple industrial worksites across the United States.

Safety Project Management

Our team customizes safety project management activities and services to meet client needs while ensuring work is performed safely, timely, and within budget. We also provide consulting expertise for all aspects of job site safety management.

Safety and Health Training

Our training programs include coaching and training executives, managers, supervisors, engineers, maintenance staff, technicians, line workers, and construction personnel in safety, health, and environmental topics. We specialize in transferring knowledge and skills through classroom instruction, web-based learning platforms, seminars, and on-the-job training programs. Our training programs cover OSHA General Industry (1910), OSHA Construction (1926), NFPA 70E®, and customized training for unique client requirements.

Safety and Health Audits and Inspections

As safety and OSHA compliance experts, we conduct on-site safety and health regulatory compliance inspections, audits, and evaluations to test the effectiveness of control systems and identify areas of improvement while lowering incidence rates through hazard identification and abatement. Additional services include performing safety and health due diligence assessments before facility builds, purchases, leases, decommissioning, and closures as well as EHS evaluations for mergers and acquisitions. Our team is available to conduct mock OSHA inspections and develop detailed actionable inspection response plans.

OUR LOCATIONS

Georgia (Corporate)

850 Center Way
Norcross, GA 30071
(770) 453-1410

Arizona

1525 North Hayden Rd.
Suite 100
Scottsdale, AZ 85257

Tennessee

1531 Hunt Club Blvd.
Suite 200
Gallatin, TN 37066
(615) 527-7084

Texas

Safety and Health Policy Development

We cut through the complexity of safety requirements and help you develop and implement a common-sense, easy-to-follow approach to maintaining a safe environment by designing and writing safety & health policies, procedures, and programs, including:

- Accident Investigation
- First Aid/CPR/AED
- Ergonomics
- Emergency Preparedness & Evacuation
- Fire Prevention
- Hazard Communication (HAZCOM)
- Hazardous Materials Management (HAZMAT)
- Hazardous Waste Operations (HAZWOPER)
- Bloodborne Pathogens
- Hot Work
- Confined Space
- Fall Protection
- Aerial Work Platforms
- Trenching/Excavation Safety
- Crane Safety
- Contractor Safety
- Hearing Conservation
- Lockout/Tagout
- Personal Protective Equipment
- Powered Industrial Trucks
- New Employee Safety Orientation
- Safety Toolbox Talks
- Safety Inspections
- Job Safety Analyses
- Safety Committees
- Safety Rules
- Electrical Safety Programs
- NFPA 70E/Arc Flash Protection
- Return-to-Work Programs
- Security Protocols

Arc Flash Hazard Assessment

This comprehensive program includes data collection, engineering analysis, single-line modeling, and on-site equipment labeling. Additional value-added services include generating energized work permits, conducting DC Arc Flash assessments, and working with clients to develop a site-specific NFPA 70E Personal Protective Equipment (PPE) system.

Electrical Safety Program

With expertise in the electrical industry on both sides of the meter, Hood Patterson & Dewar is a leader in state-of-the-art Electrical Safety Program design. Program components include:

- Load flow
- Purpose and Scope
- Policy
- Responsibilities
- Employee Training Requirements
- Inspections and Audit Standards
- Equipment Standards
- Personal Protective Equipment Requirements
- Labels, Signs, and Barriers
- Standard Operating Procedures for Electrical Work (Energized and De-Energized)

CONTACT US

The Hood Patterson & Dewar Safety Services Team stands ready to assist you with your occupational safety and health needs. To discuss your needs and our capabilities, contact the Safety Services Team. We look forward to working with you!
